ABOUT ME

I am a dedicated Computer Science student at the University of Copenhagen with a enjoyment for problem-solving. I have practical experience developing and implementing software projects, and a passion for exploring innovative solutions through personal work. I enjoy working on challenging projects, and look forward to provide help on one of yours.

In my free time, I enjoy being active. This includes both football events with the University, as well as going to the gym on a regular basis.

EDUCATION

University of Copenhagen MSc. Computer Science	2024 Sep – Present
University of Toronto Exchange semester at Computer Science St. George campus	2023 Sep – Dec
University of Copenhagen Bsc. Computer Science and Economics Bachelor project in "RISC-V based computers in the data center" with a grade of 12.	2021 – 2024

EXPERIENCE

Motorola Solutions – Student Worker As a student worker at Motorola Solutions I work in various software engineering tasks, helping with infrastructure. I mainly work with the C++ programming language.	2025-Present
University of Copenhagen – IT-employee As an IT-employee at the University of Copenhagen, I worked as the main contributor with a small team on the development of a Python library called adaXT .	2023-2025
A-Evidence – Developing assistance Throughout this job I helped with the training of the AI used in the company as well as the general office work.	2020 – 2021
Hyldegaard I/S – Office assistance At Hyldegaard my main work was keeping track of and registering the hour slips of my colleagues in the program Microsoft Dynamics C5.	2018 – 2021

PROJECTS

adaXT
[adaXT](#) is a Python module for tree-based machine-learning algorithms that is fast, adaptable and extendable. To maintain high performance, the majority of the project was written in [Cython](#).

VOLUNTEER

Blood donor
My mother has been a blood donor for and long as I can recall and I attempt to strive for the same, thus I give blood on a somewhat regular basis.

SKILLS

Advanced: C, Python, Cython, Go, C++
Intermediate: Java, F#, Haskell
